Recruiting Technical Talent

IAESTE United States™
An AIPT Program

OUR MISSION:
Developing global skills in
tomorrow's technical leaders

What is IAESTE?

IAESTE (I - ess - tay) ...

is the International Association for the Exchange of Students for Technical Experience, a global organization established in 1948 at the Imperial College in London. For more than 50 years, IAESTE has continued to grow and now includes more than 80 member countries.

IAESTE in the United States

Established in this country in 1950, IAESTE United States expanded its operations in 1998 to focus on promoting its new mission of *developing global skills in tomorrow's technical leaders*. This goal is achieved by partnering with some of the best technical and scientific universities in the country, as well as by providing domestic and international conferences and leadership seminars for U.S. university students and graduates. IAESTE United States has continued to specialize in technical and scientific internships, bringing together world-class students with top-tier companies and research institutes.

"[Our intern]... was exceptionally diligent and careful in her research. Her productivity, with respect to quality as well as quantity, was also outstanding.

... Based on her performance this summer, I would not hesitate to offer her a position in my graduate research program."

— James H. Adair, Director, Particulate Materials Center,
Pennsylvania State University

Flexible Strategies for Your Recruiting Needs

If your company, research institute, or laboratory is interested in benefiting from IAESTE United States' services or in furthering the mission of *developing global skills in tomorrow's technical leaders*, you have several strategies. No matter your particular interest, there is a way for you to become involved—just review the four strategies below and contact IAESTE United States if you have any questions.

STRATEGY 1

- The IAESTE Placement Service matches a highly qualified international intern with your company, research institute, or laboratory.

STRATEGY 2

- The IAESTE Visa Authorization Service provides the necessary paperwork to sponsor an international intern whom you have already identified.

STRATEGY 3

- Corporate Partnership provides companies with personalized service to complement your recruiting efforts at the country's best engineering and science universities.

STRATEGY 4

- IAESTE United States' annual National Conference presents several opportunities to network with globally skilled students and professionals, including exhibiting at the Global Opportunities Fair, sponsoring events or sessions, and presenting an educational session.

"Lynntech, Inc. has participated in the IAESTE program for two years. We have found it very easy to participate in because of the professional manner the organization has in handling all information, processes, and procedures.

Each intern is provided an opportunity to have an expanded learning experience working in the United States. But even more than what they learn from us, we learn from them, not only technically but culturally."

— Karen Pavlinski, HR Manager, Lynntech, Inc.

Discover the Benefits of IAESTE United States

- Broaden your internship pool to include positions for strong technical students from around the world.
- Increase your company's international edge by bringing global and intercultural awareness to your domestic staff.
- Build connections to international companies, universities, and professionals.
- Evaluate international candidates to hire at an international affiliate office.
- Learn about business and technology as it functions in other parts of the world.
- Allow a technical student from an American university to intern abroad via the reciprocal nature of IAESTE's exchange program.
- Increase the pool of globally skilled domestic students that you can plug into through IAESTE's National Conference, Corporate Partnership, or direct ties to an IAESTE Local Committee near you.
